Efficient warehouse management

Management, control and optimisation of your storage system with intelligent logistics software from Remmert!

Technical specification

Honeycomb and bridge storage systems compared

		Bridge storage system	Honeycomb storage system
Storage system size	Storage locations	**80 – 1.000**	400 – ∞
Payload/storage location	kg	**1.000 – 5.000**	1.000 – 5.000
Useful storage length	mm	**3.000 – 12.500**	3.000 – 12.500
Useful storage height	mm	**200 – 1.500**	90 – 1.500
Useful storage width	mm	**500 – 800**	500 – 2.000
Max. system height	m	**30**	30
Structural		**optional**	optional
Travelling speed	m/min	**50 – 120**	50 – 180
Lifting speed	m/min	**24 – 60**	24 – 60
Pulling speed	m/min	**16 – 32**	40 – 80
Combined storage/retrieval	operations/h	**15 – 30**	30 – 60
Warehouse management PRO WMS		**optional**	standard
HOST connection		**optional**	optional
Integration of production machines		**optional**	optional

"Due to the compact design and high level of flexibility with which this system can be integrated into our customer's production processes, we underline time and again our competence in automatic storage technology for long-bar and offer our customers measurable advantages in their production."

Matthias Remmert,
Managing Director of
Friedrich Remmert GmbH
